OBJECTIVE

Motivated MCA graduate with foundational knowledge in Python programming, machine learning concepts, and application development. Seeking an entry-level role as a Software Developer or Data Engineer to contribute to building efficient applications and automated data workflows while rapidly learning and adapting to industry-standard tech stacks.

EXPERTISE

Technical Skills (• **Programming Languages:** Python, C++ • **Mobile Development:** Flutter,Docker, GitHub • **Core Concepts:** Data Annotation, Computer Vision Fundamentals, Basic Data Models)

PROJECTS

Real-Time Traffic Sign Detection | MCA | JULY 2026

- Built an offline **Flutter** Android app using optimized **YOLO** for real-time traffic sign detection.
- Used **ONNX** and **TensorFlow Lite** quantization to minimize model size and latency.

Neurodegenerative Disease Prediction | BCA Project | Feb 2024 – Jun 2024

- Developed a Parkinson's disease prediction system using a Convolutional Neural Network (CNN), incorporating image preprocessing, model training, and performance evaluation.

EDUCATION

University of Mysore, Master of Computer Applications 2024 – 2026
9.7 CGPA

- Gained basic-level understanding in C++, Python, Digital Image Processing, Network Security, CNN, and AI learning models.

SBRR MAHAJANA FIRST GRADE COLLEGE, Bachelor of Computer Applications 2021 – 2024
9.5 CGPA

REWARD

Gold Medalist in BCA, SBRR MFGC 01/04/2025

Best outgoing Student from BCA, SBRR MFGC 01/03/2024

EXPERIENCES

Win Research centre, Business Development Intern 01/2024 – 02/2024
Delivered effective software pitches and contributed to social media content creation for brand promotion.
